

# SUSTAINABLE GARDEN DESIGN

## Explanation

- The flowers will attract bees
- The water tank and the chicken coop are at the back so they don't block the sunlight
- The chickens will provide fresh eggs everyday, eat the bugs and fertilise the garden

## Information

- Maintain soil health by rotating crops
- Plant flowers for bees so they pollinate your plants
- Plant different plants at different seasons/times
- Collect water to save money
- Compost your food scraps to put in your garden for fertiliser
- Chickens produce eggs and they eat the bugs in your garden

## Benefits

- Herbs and other vegetables cost a lot at shops but are easy to grow
- No chemicals/you know what is in your food
  - Children can learn how to garden
    - Improved mental health
    - Reduced grocery bills
    - Environmental benefits
    - Improved cost of living
